

EnerGenius® iQ 2

Automatic Battery Charger & DC Supply

12 to 240 Volts Nominal, 6 to 150 Amps

New Generation SCR Industrial/Utility Charger

Advanced: Full digital control, self-diagnostics & communications

Compatible: Fit, form & function compatible with first generation IQ chargers

Informative: Easy to read mimic panel, digital display and LEDs

Communications: Optional Modbus and DNP3

PIP specification compliant: Includes optional high current relay

Super reliable: Industry-leading 5-year warranty

SCR Power + State-of-the-art Features

IQ2 is an SCR-type industrial/utility charger that powers DC equipment, charges your battery, automatically tests battery performance, and communicates DC system status. IQ2 is an update of SENS' popular EnerGenius IQ charger.

IQ2 is fit, form and function compatible with the original EnerGenius IQ. Employing the same power train as the original EnerGenius IQ, IQ2 adds the advanced DSP-based control and firmware proven in thousands of SENS' MicroGenius and EnerGenius DC platforms.

First generation EnerGenius IQ chargers can be easily upgraded to full IQ2 function by swapping circuit boards and the front door mimic panel/LED overlay.

Demonstrating SENS' commitment to quality and to surviving harsh industrial and utility environments, IQ2 is equipped with SENS' unique corrosion-proof all stainless-steel housing and backed by industry-best five-year warranty.

Features & Benefits

Stainless steel construction

No rust and no paint to touch up. Resists corrosion far better than materials used in competing products.

Industry's best warranty coverage

The entire charger is warranted for five years.

Patented charging performance

IQ2 patented charging features deliver the industry's fastest and safest charging that, in some applications, nearly double battery life.

LED system mimic panel

Provides system status at a glance, now including ground fault indication.

Advanced functions, proven in service

IQ2 employs the same DSP-based architecture, firmware and digital data bus proven in thousands of SENS switchmode power systems.

More versatile

IQ2 meets all specs as the original EnerGenius IQ, and more. New spec compliance includes Process Industry Practices (PIP) and more flexible alarm relay configurations.

Integrated battery check cuts risk of failure

Lead-acid batteries frequently fail without warning. The on-board battery check system determines if your battery can support a connected continuous load without taking the battery offline or shutting down the charger.

Constant voltage, current limited, filtered DC

Simultaneously supplies filtered DC to critical loads, recharges the connected system battery and automatically maintains flooded lead-acid, Ni-Cd or lithium batteries in peak condition.

Upgradable from the original to IQ2

IQ2 is fit, form and function compatible with first generation IQ chargers. The easy upgrade of first generation IQ chargers enables all new functions at much lower cost than a new charger.

Housing Dimensions

Housing size Q1

Wall mount configuration
(19" rack mount also available)

Housing size Q2

Wall mount configuration
(add 3.75" [95.25 mm] height for free-standing option, 23" rack mount also available)

EnerGenius IQ2 Charger

Specifications

		Filtered ¹ 511	Eliminator ² 512	Eliminator Plus ³ 514	Extreme ⁴ 534
DC Output	12, 24, 48 110/120 or 220/240 VDC nominal	Lead, ni-cd or lithium			
	Line and load voltage regulation	+0.25%			
	Batt temp comp w/ adjustable slope and expert system	Std			
	Adjustable current limit to 100%	Std			
	Output ripple:				
	60 Hz: standard filter: 12, 24, 48V DC (on/off battery ⁵)	30 mV / 480 mV	N/A		
	60 Hz: standard filter: 120V DC (on/off battery)	100 mV / 2%	N/A

	60 Hz: battery eliminator filter: 48V DC (on/off battery)	N/A	30 mV / 30 mV		
	60 Hz: batt. elim. filter: 12, 24, 120V DC (on/off battery)	N/A	30 mV / 100 mV		
	60 Hz: batt. elim. filter: 240V DC (on/off battery)	N/A	30 mV / 200 mV		
	50 Hz: standard filter: 12, 24, 48V DC (on battery)	1%	30 mV		
	50 Hz: standard filter: 120V DC (on battery)	1%	100 mV		
50 Hz: standard filter: 240V DC (on battery)	1%	200 mV			
Timed commission charge w/ auto revert to std settings	Std				
AC Input	120/208/240 VAC, field selectable standard ⁶	Others optional			
User Interface	2 x 20 backlit LCD plus LED mimic panel	Std			
	Float, auto & manual boost charging modes and LEDs	Std			
	Manual & automatic boost charge timer 0-256 hours	Std			
	All parameters keypad adjustable, with keypad lock	Std			
Meters	1% accy digital DC V & A meters; AC V meter	Std			
	DC voltmeter displays both volts/cell and total voltage	Std			
Remote Alarms & Communications	Alarm status via summary Form C contact	Std			
	Alarm status via individual programmable Form C contacts	Optional			
	Analog data & alarm status via data communications	Optional			
	Individual programmable Form C contacts + data communications	Optional			
Battery Check	Fully adjustable automatic battery check system	Std			
Data Logging	History & event data logging, access over TCP/IP connection ⁷	Optional			
Safety & Reliability Features	Dynamic Boost™ charge control	Std			
	60 Hz units NEMA PE-5/IEEE 2405 compliant & high efficiency	Std			
	2-pole AC circuit breaker, 10K AIC	Std	N/A		
	2-pole AC circuit breaker, 18-25K AIC, w/ inrush limiter	N/A	Std		
	2-pole AC circuit breaker, 65K AIC, w/ inrush limiter	N/A	Factory option ⁸		
	2-pole UL Listed DC circuit breaker	Std			
	Electronic soft start & programmable start delay	Std			
	Backwards battery protection	Alarm	Alarm + diode		
	Dual-microprocessor architecture	Std			
	All-digital design - no potentiometers	Std			
	Conformal coated; surface-mount technology circuit cards	Std			
	Redundant and selective over voltage shutdown	Std			
	-40C to +50C operating temp with overtemp current cutback	Std			
	Boost pilot relay ⁹	Std			
	Battery temperature compensation	Std			
	Remote battery temperature compensation ¹⁰	Optional			
	Digital load and mode sharing system ¹¹	Optional			
Surge withstand: ANSI 62.41, ANSI C37.90, IEC 61000-6-2	Std				
Blocking diode & reverse polarity protection diode	N/A	Std			
Display and alarm relay test	Std				
Industry Standards & Agency Compliance	60 Hz units: C-UL listed to UL and CSA standards ¹²	Std			
	50/60 Hz units: C-UL listed + CE marked ¹²	Std			
	3rd party certified to IBC 2006-2021; Sds value of 2.50g ¹³	Std			
	OSHPD seismic pre-approval ¹³	Factory option			
	ABS Type Approved. Meets USCG requirements ¹⁴	Std			
	RF emissions: FCC Part 15 Class A; EN 61000-6-4	Std			
	RF immunity: EN 61000-6-2	Std			
	Process Industry Practices (PIP) compliance	Optional (includes wire markers, high current relay and breaker locks)			
Mechanical	NEMA 1, IP 20 protection rating	Std			
	Rugged stainless steel housing	Std			
	Drip shield (IP21 and IP22 options)	Optional			

"Std" = standard feature. "N/A" = not available. "Factory option": factory installed option only. "Optional": Feature can be installed in the system at any time. (1) Lowest cost package. (2) Specify for lower output ripple. (3) Adds reverse polarity protection and blocking diodes to Eliminator package. (4) Specify for sites with heavier electrical transients and/or where AC supply is of low impedance. (5) "On battery" ripple measured at the terminals of a battery rated in AH > 4 times charger's amp rating. "Off battery" ripple measured at the load end of charger output cables. (6) On units rated < 3.4 KW output. Higher power units require either field selectable 208/240 input or single input voltage. See last page for details. (7) Requires Remote Alarms & Communications Feature Package M or N (see ordering section). (8) Only available in larger Q2 housing. (9) Configure any desired relay as a pilot relay. Factory configuration for Boost requires Remote Alarms & Communications Feature Package C or N (see ordering section). (10) Requires optional remote temp sensor or SENS battery monitor. (11) Requires optional load share accessory. (12) Listed to UL 1012 and CSA 22.2 No. 107.2. Listing to UL 1236 is special order option for 12 and 24 volt chargers. (13) Wall-mount units only. (14) May require optional IP22 dripshield to meet USCG requirements.

How To Order EnerGenius IQ2 Charger

Product Type	DC Volts	Output Current	AC Volts	Agency Marks	Feature Pkg	Alarms/Comms	Mount
Q	024	050	T	L	514	A	
(A)	(B)	(C)	(D)	(E)	(F)	(G)	(H)

	Parameter	Code	Value
(A)	Product Type	Q	EnerGenius IQ
(B)	DC Output Voltage	012 024 048 120 240	12 VDC nom. 24 VDC nom. 48 VDC nom. 120 VDC nom. 240 VDC nom.
(C)	Output Current	006 012 016 025 035 050 075 100 150	6 A 12 A (smallest 12 VDC charger) 16 A 25 A (largest 240 VDC charger) 35 A 50 A (largest 120 VDC charger) 75 A 100 A (largest 12 & 48 VDC chargers) 150 A (largest 24 VDC charger)
(D)	AC Input Voltage	T P Z 8 4 V	115-120/208/230-240 V, 60 Hz 115-120/208/230-240 V, 50/60 Hz 208/230-240 V, 60 Hz (> 3.4 KW output power) 480 V, 60 Hz 230 V, 50/60 Hz (> 3.4 KW output power) 400 V, 50/60 Hz
(E)	Agency Marks	L G H J	C-UL 1012 listed (60 Hz units) C-UL 1012 listed & CE marked (50/60 Hz units) C-UL 1236 listed (60 Hz units) C-UL 1236 listed & CE marked (50/60 Hz units)
(F)	Feature Package ¹	511 512 514 534 574	Filtered package: Standard input breaker and standard output filter Eliminator package: Adds lower ripple filter to Filtered package Eliminator Plus package: Adds reverse polarity diode and blocking diode to Eliminator package Extreme package: Adds inrush limiter to Eliminator Plus package and upgrades input breaker to 18-25K AIC rating Extreme package: Upgrades input breaker in 534 to 65K AIC. Available only in Q2 housing
(G)	Remote Alarms & Communications Feature Packages ²	A C M N P S	Summary Form C alarm (30V/2A) ³ 7 Form C alarms (30V/2A) ³ & 1 Form C alarm (120VAC/5A) 5 Form C alarms (30V/2A) ⁴ & Modbus 10/100Base-T and RS-485 Options C and M 5 Form C alarms (30V/2A) ⁴ & DNP3 10/100Base-T and RS-485 Options C and P
(H)	Mounting	(Blank) E R	Wall mount or optional free-standing Q2 OSHDP pre-approved (wall mount units only) Relay rack mount (factory installed option only)

(1) "5" indicates standard NEMA PE-5/IEEE 2405 compliance. Replace "5" with "6" to add PIP compliance. PIP requires Remote Alarms & Communications Feature Package C or N. (2) Data logging requires Remote Alarms & Communications Feature Package M, N, P or S. (3) Terminal blocks accept 14-24 AWG wire. (4) Terminal blocks accept 16-28 AWG wire.

Optional Features

- Freestanding, floor-mounting housing (size Q2 only): Order p/n 209399
- Drip shield: Order 209320 for IP21 Q1, 209321 for IP21 Q2, 209324 for IP22 Q1, or 209325 for IP22 Q2
- Remote temperature sense cable: Order p/n 209481
- Load share accessory: Order p/n 209069
- Optional charger packaging: relay racks or cabinets (NEMA 1 and NEMA 3R). Contact factory.

^a Indicates standard input voltage configuration. Standard input voltage configuration for 50/60 Hz units is either field selectable 120/208/220-240 VAC or 230 volts. Circuit breaker ratings are identical for field selectable units. 400 VAC, 50/60 Hz is available on special order. ^b Current ratings shown are for respective input voltages. Current consumption at nominal input voltage is 8-13% less than worst case value shown, depending on model. ^c Numbers in black show AC input breaker ratings that correspond to input voltage options. Number in blue shows DC output breaker rating.
