

PALLET JACK/FORKLIFT TRANSFER CARTS

→ 5,000 LB CAPACITY

**Safe and affordable heavy duty
transportation of forklift batteries.**

Whether you are utilizing opportunity charging, or conventional charging these durable carts allow batteries to be removed quickly from forklifts for charging, servicing or watering. Ideal for situations where 5-20 batteries are moved per day, these heavy duty transfer carts are available in several models and widths.

Sackett has transfer cart solutions that save you time – and money, while keeping your business moving.

HPT-PL

Model HFT is a heavy duty transfer cart that is used with a fork lift, and is a great back-up unit for man-on-board systems. This transfer cart is great for situations where you may need a back-up unit due to Preventative Maintenance, Service or Repairs.

Model HPT is a heavy duty pallet jack style transfer cart, which can be bolted onto a pallet jack, or ordered with a drive under base.

Model HPT-DL is a dual level roller bed transfer cart that accomodates both sit down and reach truck batteries.

Model HPT-PL is the most versatile option for accomodating trucks with a variety of roller height dimensions.
